“Recent Results from the Tevatron”

**Monday (!), November 5th, 2007, 11:30**

**OFLG/402 (!)**

**Abstract:**

After a brief introduction on the Tevatron and the experiments, a selection of recent results will be presented. The Tevatron is performing well and currently the collaborations have about half of the total amount of data expected by the end of running. Emphasis will put on the measurements presented at summer conferences as well as a few more recent results. Some expected sensitivities with increased data will also be presented.
