

Acknowledgements

The PSI Zuoz summer school entitled “*The Challenge of Supersymmetry*” took place from August 15 – August 21, 2004 in the “Lyceum Alpinum”, Zuoz (Engadin), Switzerland. It was the 16th in a series of schools on particle physics organized by the Particle Physics Theory Group of PSI. Among the 85 participants, 19 came from PSI, another 14 from Switzerland, 34 from Western Europe, and 8 from overseas. This school would not have been possible without the help of many people and institutions.

We thank the directorate of PSI for the continuing support of the Zuoz meetings. Participation of some researchers from Belarus, Bulgaria, Russia, Poland, and Ukraine was made possible due to grants from the *Schweizerischer Nationalfonds zur Förderung der wissenschaftlichen Forschung* (SNF) within the SCOPES program for which we are very grateful.

We are obliged to the members of the program committee, *K. Gabathuler (PSI), R. Horisberger (PSI), Z. Kunszt (ETH Zürich), F. Pauss (ETH Zürich), R. Rosenfelder (PSI), and D. Wyler (U. Zürich)* who helped us to set up the program and to select the speakers.

We thank the speakers for delivering well-prepared, excellent and inspiring lectures and being available for discussions with the participants. Particular thanks go to H. Haber, who stepped in for D. Wyler on a very short notice.

Valuable help for all kinds of little and heavy duties was provided by the members of the Particle Physics Theory Group before and during the meeting. In particular, we are indebted to M. Walser, who explored the nice excursion to the National Park and who helped us in connecting the computers to the internet. We also thank all the participants who served as chairpersons or gave seminars.

We gratefully acknowledge the enthusiasm of many young physicists for taking the challenges of school (seminars), lyceum (disco), village (pubs) and the limits of their physical condition during the excursion.

We are very happy that this series of meetings can take place in the unique surroundings of the “Lyceum Alpinum” in Zuoz which provides not only excellent food, lodging and service for the participants but also adds a particular flair to the atmosphere of the summer school. We are very grateful to the management of the Lyceum for the continuing hospitality, to Mr. B. Hübner and Mr. D. Bezzola for the pleasant cooperation in administrative matters and to the Lyceum staff, in particular to Mrs. S. Brunies, for making our stay in Zuoz enjoyable.

Finally, it is a real pleasure and a necessity to thank our secretary Mrs. Anita Van Loon for her untiring efforts in handling all administrative issues and organizational problems of this school. Without her professional, efficient and devoted work this meeting would not have proceeded so smoothly and successfully.

November 16, 2004
